

Environmental Policy

Pruce Newman Pipework Limited (the 'Organisation') recognises the importance of protecting the Environment. It is committed to operating the business responsibly and in compliance with legal requirements relating to the fabrication and/or erection of pipework, steelwork and installation of plant and equipment. The Organisation cooperates and maintains good relations with regulatory bodies and the local authorities and communities wherever it operates.

The Organisation aims to carry out all reasonably practicable measures to meet its legal responsibilities and to develop good practices in order to continually improve the performance of the Environmental Management Systems. This is to be achieved through the implementation of the following objectives:

- i. Assess and regularly re-assess the Environmental effects relating to the Organisation's activities
- ii. Reduce production of waste
- iii. Reduce material consumption
- iv. Contribute to sustainability by the recycling of materials
- v. Reduce energy consumption
- vi. Invest in energy efficient products and services
- vii. Reduce and/or limit the production of pollutants to water, land and air
- viii. Control noise emissions from operations
- ix. Minimise the risk to the public, employees, flora and fauna from operations and activities undertaken by the Organisation
- x. Raise employees' awareness of the Organisation's commitments to Environmental conservation.

The Organisation recognises that while operating on client's premises that their Environmental policy may have to take precedence over this policy.

The policy will be continually reviewed and revised as required to meet the changing needs of the Organisation, technical innovations and legislative developments.

The policy shall be:

- i. available and be maintained as documented information
- ii. communicated, understood and applied within the Organisation
- iii. available to relevant interested parties, as appropriate.
